- adjustable safety straps
- stabile and self-supporting
- easy to take person from wheel chair and place into Evac Skate
- durable crawlers grip stairs securely
- crawlers have a good grip on any kind of stairs.

## Design

The Evac Skate is an evacuation device used to move people with a disability or injury down stairways quickly and safely during an emergency. It's patented speed governor and braking system allows a small attendant to easily evacuate a larger passenger.

In an emergency such as a fire or an earthquake, elevators should not be used. People with limited mobility may be trapped. Evac Skate provides a lifeline to safety.

minimum stair landing dimensions

Easy to transport

Steel cabinet for quick storing of the Evac Skate  
W x D x H:
